

## SDG Goal 8 Decent work and economic growth

**SDG Target 8.9** By 2030, devise and implement policies to promote sustainable tourism that creates jobs and promotes local culture and products

**SDG Indicator 8.9.1** Tourism direct GDP as a proportion of total GDP and in growth rate

|   |  |
|---|--|
| 1. Name of data series                                  |  |
| <b>Share of tourism industries to total value added</b> |  |
| Compliant with SDG metadata: no, metadata not available |  |

|   |  |
|---|--|
| 2. Definition of indicator  |  |
| The data series gives the percentage of the Gross Domestic Product (GDP) that is to say gross value added generated by all industries in response to internal tourism consumption. Tourism direct GDP specifies hereby, that only industries which – put simply – have direct contact with visitors are considered. Industries only supplying to industries in direct contact with visitors are not included. |  |
| 3. Comparison with SDG metadata   |  |
| No metadata available   |  |

|   |   |
|---|---|
| 4. Data description   |   |
| <p>Data is derived from two studies commissioned by the Federal Ministry for Economic Affairs and Energy and carried out by Bundesverband der Deutschen Tourismuswirtschaft, DIW Econ and others. It is based on the implementation of the Tourism Satellite Account, an international standard statistical framework for the economic measurement of tourism, for Germany.</p> <p>Data for 2010 is based on the German Classification of Economic Activities from 2003 (WZ 2003), while data for 2015 is based on the German Classification of Economic Activities from 2008 (WZ 2008) and hence is based on a different product classification. Furthermore the differentiation of tourism characteristic goods was slightly changed. Hence the given data is not comparable over time.</p> <p>The data on GDP is calculated by the Federal Statistical Office's National Accounts as a secondary statistic. GDP is adjusted based on a price base changing every year (previous year's price base). After several revisions due to new data input, final results are available four years after the first preliminary release.</p> |   |
| 5. Calculation method   |   |
| $\text{Share of tourism's industries value added} = \frac{\text{Tourism direct GDP}}{\text{GDP}}$   |   |
| 6. Unit of measure  | % |

|                          |                    |
|--------------------------|--------------------|
| 7. Timeliness            | 8. Frequency       |
| t + 2 years              | Irregular          |
| 9. Last regular revision | 10. Revised period |
| Not applicable           | Not applicable     |
