**SDG Indicator 16.7.1** Proportions of positions (by sex, age, persons with disabilities and population groups) in public institutions (national and local legislatures, public service, and judiciary) compared to national distributions

1. Name of data series	
<b>Total female persons in employment</b>	
Compliant with SDG metadata: no, metadata for that part not available	

2. Definition of indicator	
The indicator measures the share of female persons compared to the total persons in employment.	
3. Comparison with SDG indicator	
Additional indicator The indicator measures the share of female employees compared to the total number of employees in the public sector, not the proportions of positions in public institutions compared to national distributions.	

4. Data description	
The data on persons employed in total, as well as disaggregated by sex, stem from the Microcensus. The Microcensus is an inquiry directed to households, designed to obtain information on the labour market and related issues through a series of personal interviews with a sample of 1 %. The Microcensus is designed as a multi-topic survey, integrating many different subject fields. The European Labour Force Survey (LFS) is integrated into the Microcensus and is harmonised in all EU member states.	
5. Calculation method	
$\text{Share of female persons in employment} = \frac{\text{Number of female persons in employment}}{\text{Number of total persons in employment}} * 100$	
6. Unit of measure	%
