

SDG Goal 3 Good health and well-being

SDG Target 3.2 By 2030, end preventable deaths of newborns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1,000 live births and under-5 mortality to at least as low as 25 per 1,000 live births

SDG Indicator 3.2.1 Under-five mortality rate

1. Name of data series	
Infant mortality rate (under 1 year)	
Compliant with SDG metadata: yes	SDG Metadata

2. Definition of indicator	
Infant mortality is the probability of a child born in a specific year or period dying before reaching the age of 1 year, expressed per 1,000 live births.	
3. Comparison with SDG metadata (as of 10/11/2016)	
The indicator is compliant with the mentioned sub-indicator(s) in the international metadata description of the SDG indicator 3.2.1.	

4. Data description	
Data on deaths are derived from the death statistics or the causes of death statistics and data on registered live births from the birth statistics. All of the mentioned statistics were conducted by the Federal Statistical Office and are based on administrative data (e. g. official death certificates).	
5. Calculation method	
Infant mortality rate = $\frac{\text{Deaths of children aged 0 to under 1 year (number)} \times 1,000}{\text{Registered live births (number)}}$	
6. Unit of measure	Per 1,000 live births

7. Timeliness	8. Frequency
t + 9 months	Annual
9. Last regular revision	10. Revised period
Not applicable	Not applicable

11. Accessibility of source data
