

SDG Goal 3 Good health and well-being
SDG Target 3.1 By 2030, reduce the global maternal mortality ratio to less than 70 per 100,000 live births
SDG Indicator 3.1.2 Proportion of births attended by skilled health personnel

1. Name of time series	
Child deliveries in hospitals	
Compliant with global metadata: yes, partly	Global Metadata
2. Definition of time series	
The time series includes child deliveries in hospitals. These births are attended by skilled health personnel like doctors, nurses or midwives.	
3. Comparison with global metadata (as of 18/02/2020)	
<p>The time series is only partly compliant with the global metadata as it only includes child deliveries in hospitals. Child deliveries can also take place as home births and are usually attended by skilled health personal for example. Voluntarily reported data of home births do exist, but the data are not consistent with the data of the hospital statistics of the Federal Statistical Office.</p> <p>Additionally, this time series includes children that are born dead, and the age of the mother is not limited from 15 to under 50 years of age as the global metadata request. The hospital statistics do not offer the dissagregation by age or the information, if the children were born alive.</p>	
4. Data description	
The data on live births in hospitals are derived from hospital statistics (mandatory census). It is conducted by the Federal Statistical Office.	
5. Calculation method	
$\text{Child deliveries in hospitals} = \sum \text{Child deliveries in hospitals [number]}$	
6. Unit of measure	number
7. Timeliness	8. Frequency
t + 9 months	Annual
9. Last regular revision	10. Revised period
Not applicable	Not applicable
11. Accessibility of source data	
Child deliveries in hospitals (number and percentage). Classification: years, region, type of child delivery http://www.gbe-bund.de/gbe10/pkg_isgbe5.prc_isgbe?p_uid=gast&p_aid=0&p_sprache=E	
12. Metadata on source data	
Quality report of hospital statistics - Grunddaten der Krankenhäuser (only available in German): https://www.destatis.de/DE/Methoden/Qualitaet/Qualitaetsberichte/Gesundheit/einfuehrung.html
