

SDG Goal 16 Peace, justice and strong institutions

SDG Target 16.2 End abuse, exploitation, trafficking and all forms of violence against and torture of children

SDG Indicator 16.2.1 Proportion of children aged 1-17 years who experienced any physical punishment and/or psychological aggression by caregivers in the past month

1. Name of data series	
Children at acute risk of harm with signs of physical or psychological abuse	
Compliant with SDG metadata: no	SDG Metadata

2. Definition of indicator
The indicator measures the proportion of children aged 1-17 years who were at acute risk of harm with signs of physical or psychological abuse in the previous 12 months.
3. Comparison with SDG indicator (as of 01/03/2019)
The indicator measures the number of interventions because of physical and/or psychological aggression against children during the reporting year and not in the last month, as defined in the SDG metadata description. Data does also not explicitly capture if the violator was the caregiver.

4. Data description
<p>Data stems from the statistics of child and youth welfare. The statistics gather data from the youth welfare offices about the incidences of acute risk of harm of the child (complete survey). Acute risk of harm of a child is defined in § 8a passage 1, Code of Social Law VIII. It is the case when the situation for a child/adolescent is such that a considerable damage of the physical or psychological health of the individual has occurred or is to be expected to happen with a high certainty and the caregiver does not or cannot prevent this damage to happen.</p> <p>The assessment is done by employees of the youth welfare offices in situ in cooperation with qualified experts. The statistics include all cases of acute risk of harm reported in the country and distinguishes between neglect, physical, psychological and/or sexual abuse. For the SDG indicator it is possible to focus on physical and/or psychological abuse. Data are available for one-year-age-groups up to 18.</p>
5. Calculation method
<p>Children at acute risk of harm with signs of physical or psychological abuse</p> $= \left(\frac{\text{number of children at acute risk of harm with signs of physical or psychological abuse}}{\text{total number of children}} \right) * 100$
6. Unit of measure
%

7. Timeliness	8. Frequency
t + 9 months	Annual
9. Last regular revision	10. Revised period
