

SDG Goal 8 Decent work and economic growth

SDG Target 8.10 Strengthen the capacity of domestic financial

institutions to encourage and expand access to banking,

insurance and financial services for all

SDG Indicator 8.10.1 (a) Number of commercial bank branches per 100,000 adults

and (b) number of automated teller machines (ATMs) per 100,000

adults

1. Name of data series		
Branches of payment service providers (per 100 000 adults)		
Compliant with SDG metadata: yes	SDG Metadata	

2. Definition of indicator

The indicator measures the number of branch offices of institutions offering payment services to non-payment service providers (total) per 100 000 adults (age 15 and over).

3. Comparison with SDG metadata (as of 17/07/2017)

The time series provided is inline with the global SDG-Metadata.

4. Data description

Directive 2007/64/EG defines six categories of payment service providers, amongst others credit institutions or post office giro institutions etc. Furthermore the sector "non-PSPs" includes the component sectors "Central government" and "Rest of the world". Thus, this indicator is not a synonym of the term used in the ECB concept of narrow money supply (M1).

The data on population for the years 2011 to this day is calculated by the Federal Statistical Office based on the Census in 2011 and has, since then, continuously been updated. Before 2011, updated Census data from 1987 for the Federal Republic of Germany and the population register of October 1990 for the German Democratic Republic were used. For the year 2010 the population was calculated backwards accordingly.

5. Calculation method

6. Unit of measure Per 100 000 adults

7. Timeliness	8. Frequency
Not available	Annual
9. Last regular revision	10. Revised period

SDG Goal 8 Decent work and economic growth

SDG Target 8.10 Strengthen the capacity of domestic financial

institutions to encourage and expand access to banking,

insurance and financial services for all

SDG Indicator 8.10.1 (a) Number of commercial bank branches per 100,000 adults

and (b) number of automated teller machines (ATMs) per 100,000

adults

1. Name of data series

ATMs of national payment service providers (per 100 000 adults)

Compliant with SDG metadata: yes SDG Metadata

2. Definition of indicator

The indicator measures the number of automated teller machines of national payment service providers per 100 000 adults (age 15 and over).

3. Comparison with SDG metadata (as of 17/07/2017)

The time series provided is inline with the global SDG-Metadata.

4. Data description

Regulation (EU) No 1409/2013 of the European Central Bank defines an ATM as an electromechanical device that allows authorised users, typically using machine-readable physical cards, to withdraw cash from their accounts and/or access other services, allowing them, for example, to make balance enquiries, transfer funds or deposit money. A device allowing only balance enquiries does not qualify as an ATM. The ATM may be operated online, with a real-time request for authorisation, or offline.

The data on population for the years 2011 to this day is calculated by the Federal Statistical Office based on the Census in 2011 and has, since then, continuously been updated. Before 2011, updated Census data from 1987 for the Federal Republic of Germany and the population register of October 1990 for the German Democratic Republic were used. For the year 2010 the population was calculated backwards accordingly.

5. Calculation method

ATMs of national payment service providers = $\frac{\sum ATMs \text{ (number)}}{\frac{Adult \text{ population}}{100 000}}$

6. Unit of measure Per 100 000 adults

7. Timeliness	8. Frequency
