SDG Goal 16 Peace, justice and strong institutions

SDG Target 16.5 Substantially reduce corruption and bribery in all their forms

SDG Indicator 16.5.1 Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months

1. Name of data series
Population who had the impression that public officials are corruptible (during their interactions with public agencies in the previous two years), by sex
Compliant with SDG metadata: no   **SDG Metadata**

2. Definition of indicator
The time series measures the share of population who had the impression that public officials are corruptible during their interactions with public agencies in the previous two years.
The time series measures the share of respondents of the Life Situation Survey that agree with the following statement regarding their interaction with a government agency during the last two years "In the context of my request I had the impression that the personnel of the [government agency] are corruptible."
The given rating scale ranges from fully agree, rather agree, partly agree, rather disagree to fully disagree.

3. Comparison with SDG metadata (as of 16/07/2016)
The time series provided is based on the impression of persons that public officials are corruptible rather than if they actually paid a bribe or were asked for one. Hence the time series provided might result in a higher percentage than the actual indicator would. It furthermore covers the last two years instead of one.

4. Data description
Data is derived from the Life Situation Survey which is commissioned by the Federal Government and carried out by the Federal Statistical Office. In 2017 around 6 000 citizens and more than 2 000 business were interviewed.
The 2017 survey includes data on more government agencies than the 2015 survey.

5. Calculation method

$$\text{Impression that public officials are corruptible} = \frac{\text{Respondents that fully agree, rather agree and partly agree to the statement}}{\text{All respondents}}$$

6. Unit of measure	%

7. Timeliness	8. Frequency
t + 1 year	Every two years
9. Last regular revision	10. Revised period
Not applicable	Not applicable

11. Accessibility of source data
Special analysis; Other results from the Life Situation Survey (Only available in German): www.amtlich-einfach.de
12. Metadata on source data
General information on the Life Situation Survey (Only available in German): www.amtlich-einfach.de
13. Related SDG data series (duplicate indicators or sub-indicators to same indicator)
16.5.1 Private persons (donors) suspected in the context of corruption offences   16.5.2 Enterprises who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by these public officials, during the last 12 months   16.6.2 Population satisfied with their experience of government services during the previous two years   16.7.2 Population who considers their experiences with public agencies free of discrimination during the previous two years, by sex

SDG Goal 16 Peace, justice and strong institutions

SDG Target 16.5 Substantially reduce corruption and bribery in all their forms

SDG Indicator 16.5.1 Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months

1. Name of data series
Private persons (donors) suspected in the context of corruption offences
Compliant with SDG metadata: no   **SDG Metadata**

2. Definition of indicator
The time series gives the number of private persons suspected in the context of corruption offcences as donors that is to say providers of a bribe.
3. Comparison with SDG indicator (as of 16/07/2016)
The time series provided enumerates the number of private persons suspected as donors in the context of corruption offences. It hence does not provide the percentage of persons that actually paid a bribe to a public official or were asked for one.

4. Data description
The data on private persons (donors) suspected in the context of corruption offences stem from the "Federal Situation Survey Corruption", which is a statistic of the Germany's Federal Criminal Police Office on corruption. The data are based on the criminal investigation offices of the Länder. The differentiation of private persons as donors is available till 2016.
5. Calculation method
